Version	1.0
Effective Date	[Insert Date]
Review Date	[Insert Date - Recommend Annual]
Owner	[Data Governance Office]
Approved By	[Chief Data Officer]
Classification	Internal Use

How to Use This Document

This document contains a set of standalone "cards" — each section below is designed to be printed, cut out, or distributed individually as a desk reference, intranet tile, or onboarding handout. Customize the bracketed fields for your organization before distribution.

Card 1: Data Classification at a Glance

Level	What It Means	Example	Handling
Public	Safe for anyone to see	Marketing brochures	No restrictions
Internal	For employees only	Internal org charts	Don't share externally
Confidential	Sensitive business/personal data	Customer contracts, salaries	Restricted access; encrypt when shared
Restricted	Highest sensitivity	SSNs, health records, trade secrets	Strict access controls; approval required to share

Card 2: Five-Second Data Quality Check

Before you trust or use a dataset, ask:

1. **Complete** — Are required fields filled in?
2. **Accurate** — Does it match the source of truth?

3. **Consistent** — Does it match other related data?
4. **Timely** — Is it current enough for this use?
5. **Unique** — Are there unexpected duplicates?

If the answer to any is "no" — report it before using the data for a decision.

Card 3: Who Do I Contact?

Need	Contact
Data accuracy question	Business Data Steward
Sharing/privacy question	Data Privacy Officer
Report a data issue	Data Governance Office / Issue Tracker
Retention question	Records Management / Data Retention Policy
General governance question	[Governance Office email/Slack channel]

Card 4: Data Handling Dos and Don'ts

Do:

- Use approved, catalogued data sources
- Check classification before sharing
- Report suspected errors

Don't:

- Email confidential/restricted data unencrypted
- Store company data on personal devices/drives
- Keep data longer than the retention schedule allows

Card 5: Key Roles in Data Governance

Role	What They Do
Chief Data Officer	Owns the overall governance program
Data Governance Council	Sets strategic policy and resolves escalations
Business Data Steward	Owns data quality and definitions in a domain
Technical Data Steward	Manages systems and technical implementation
You (Data User)	Follows policy, reports issues, protects sensitive data

Card 6: Escalation Path

6. **Data Steward** — domain-specific issues
 7. **Data Governance Office** — cross-domain issues, policy questions
 8. **Data Governance Council** — strategic or unresolved issues
 9. **Executive Sponsor** — organizational-level impact
-

Document Control:

- This is a template document requiring customization for specific organizational needs
- Sections in [brackets] require organization-specific information
- Recommended use: print individual cards for desks, breakrooms, or intranet tiles
- Regular updates required to maintain currency and effectiveness
